

**Call for Participation**  
**OpenSky Workshop 2015, Oxford (UK)**  
**November 26-27**  
<https://opensky-network.org/events>

Since its creation in 2013, the OpenSky Network has quickly evolved to a large-scale air traffic control data collection and sharing platform. With now more than 30 sensors operated by volunteers across the globe, the OpenSky Network is today greatly contributing towards the vision of a more efficient, secure and reliable operation of the airspace by providing open accessibility of air traffic control data to the public.

Following the successful workshops in 2013 and 2014, the third instance of the OpenSky workshop will be hosted in Oxford (UK) during two consecutive days in November 2015. The event is open to all current contributors of the network (sensor operators, system developers and administrators, and researchers) as well as to any interested party that wishes to get involved to the OpenSky network in the future.

The workshop will act as a forum to discuss ideas and present ongoing research activities around the OpenSky network. Participants are invited to actively contribute to the program by presenting at the workshop. In addition to that, the workshop will include technical talks on OpenSky's architecture and data at first hand.

#### **Call for Presentations**

The workshop invites presentations from the community. The workshop is interested in presentations that can foster discussions and provide inputs for the future development and research around OpenSky. Potential presenters are free to choose any topic for their presentations, but the presentations should be related to the OpenSky network in a wider sense. Presentations can be either 25 or 50 minutes long. Proposals including a presentation title, abstract, and the desired slot duration should be submitted no later than October 30<sup>th</sup> 2015 by email to [workshop15@opensky-network.org](mailto:workshop15@opensky-network.org). Attendance will be limited to 20 people to facilitate lively discussions at the workshop. The organizers reserve the right to reject submitted proposals if they do not fit into the program.

#### **Venue**

The workshop will take place at the University of Oxford, UK. The University is located in the city center of Oxford and easily accessible from the main London airports by bus or train.

#### **Important dates**

Presentation titles due:	October 30 <sup>th</sup> 2015
Notification of acceptance:	November 6 <sup>th</sup> 2015
Program announcement:	November 13 <sup>th</sup> 2015
Workshop dates:	November 26-27 <sup>th</sup> 2015

#### **Organizing Committee**

Local Chair:

Ivan Martinovic (University of Oxford, UK)

Program Chairs:

Matthias Schäfer (TU Kaiserslautern, Germany)

Vincent Lenders (armasuisse, Switzerland)
